

Domestic Security Shutters

- Manufactured from foam filled aluminium slat 43mm deep, @ 6mm thick.
- Offers a good level of sound and heat insulation.
- Available in White, Brown or Cream.
- Box and Guides only available in White or Brown.
- For special colours "click" on Commercial Security Shutters.
- The Foam Filled Aluminium Domestic Security Shutter is ideal for low to medium risk application and is excellent value for money.
- Excellent deterrent to burglars.

Three versions are available

Swivel Belt - Manual Operation

The pull-belt is fitted neatly through the wall and activated from the inside. Usually neatly hidden behind curtains.

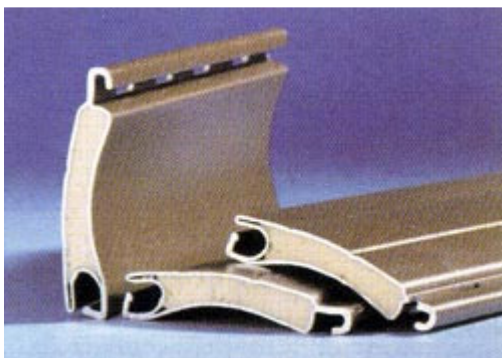

Spring and Lock

A lock fitted into the reinforced bottom rail gives more security. Can be locked/unlocked from inside or outside if access allows. Spring loaded for quick and easy use.

Electric

Activated by a neat internally or externally positioned switch/key switch. Good level of security. Very convenient. Little extra cost.

The vented slat seen to the right is an option (at no additional cost) on the **Swivel Belt** and **Electric** versions. It allows ventilation and shade when in the partly open position.

Typical Electric Security Shutter

Note the neat Full Box Housing, matching Guides and Aluminium Sill Section available at no extra cost if required. Ideal to prevent would be burglars levering the bottom of the door with a Jemmy Bar. Neat appearance from inside and outside.
